Children's accessories

# #movewithtrust

For EZIMOOV, designing products is like sticking your fingers up your nose: it's a pleasure, an irreverence, research with an ultimate goal always.

We begin with an idea, a range of car accessories for children as the first step of a long story. We put in the very best of our quirkiness and our nose. Always this story of the nose.

All this to achieve an ultimate goal: eco-responsibility.

We are impatient, sometimes too much so, but we know that we cannot do everything at once. We have to look for the best components, the best manufacturing methods, and the best sources of recycling to reduce the carbon footprint step by step and sale by sale.

But the goal is there: we start by taking used plastic bottles, crushing them, and reusing them in our products. But that's just the beginning. We are moving forward together in a virtuous circle to go further.

So everyone sticks their finger in your nose and follows the EZIMOOV path.
